

Allowing access to Module Manager to the "Manager" Group

Open the Module Manager

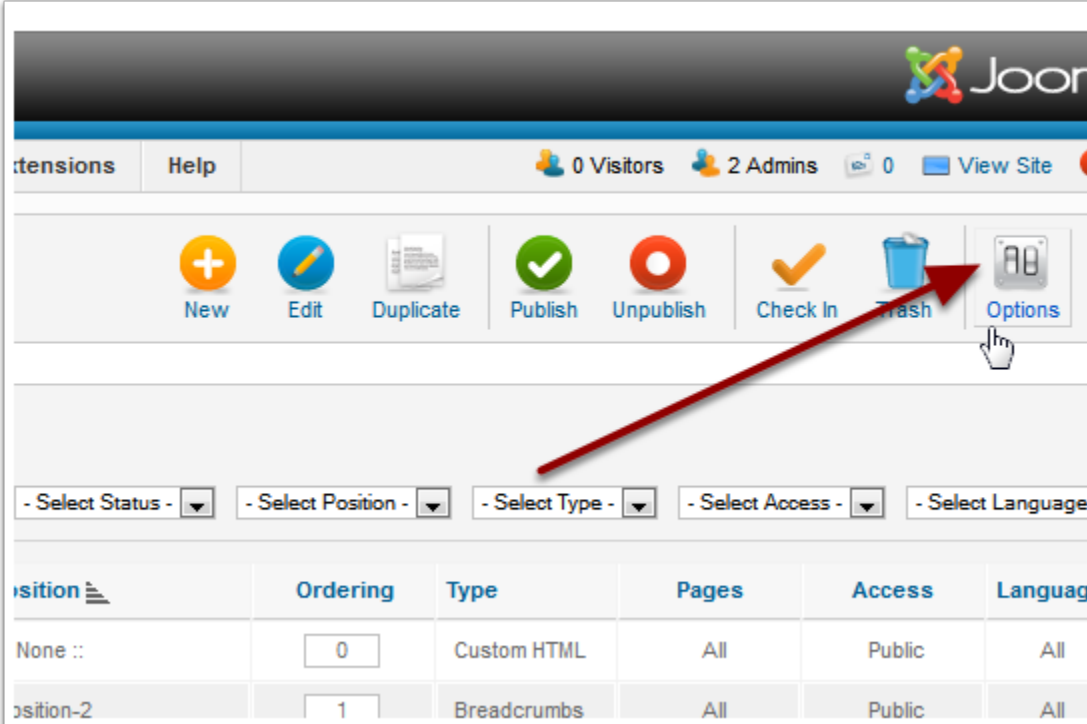

The screenshot shows the Joomla! Administration interface. The top navigation bar includes tabs for Site, Users, Menus, Content, Components, Extensions, and Help. The Extensions tab is active, and a dropdown menu is open, highlighting the Module Manager option. Other options in the menu include Extension Manager, Plug-in Manager, Template Manager, and Language Manager. The main content area displays a message about the default language and a warning about multilingual functionality. Below the message is a table listing installed languages.

Num	Language	Language Tag	Location	Default	Version	Date	Author	Author Email
1	Dutch (NL)	nl-NL	Administrator	☆	2.5.8	2012-11-07	Dutch Translation Team	taal@joomla.com
2	English (United Kingdom)	en-GB	Administrator	★	2.5.5	2008-03-15	Joomla! Project	admin@joomla.com
3	Flemish (Belgium)	nl-BE	Administrator	☆	2.5.8.1	2012-11-08	Flemish translation team: Pangea	frank.joris@skyn.be
4	French (fr-FR)	fr-FR	Administrator	☆	2.5.8.1	9 oct 2012	French translation team : joomla.fr	traduction@joomla.fr

Open the Module Manager, under "Extensions > Module Manager"

Allowing access to Module Manager to the "Manager" Group

Open "Options"

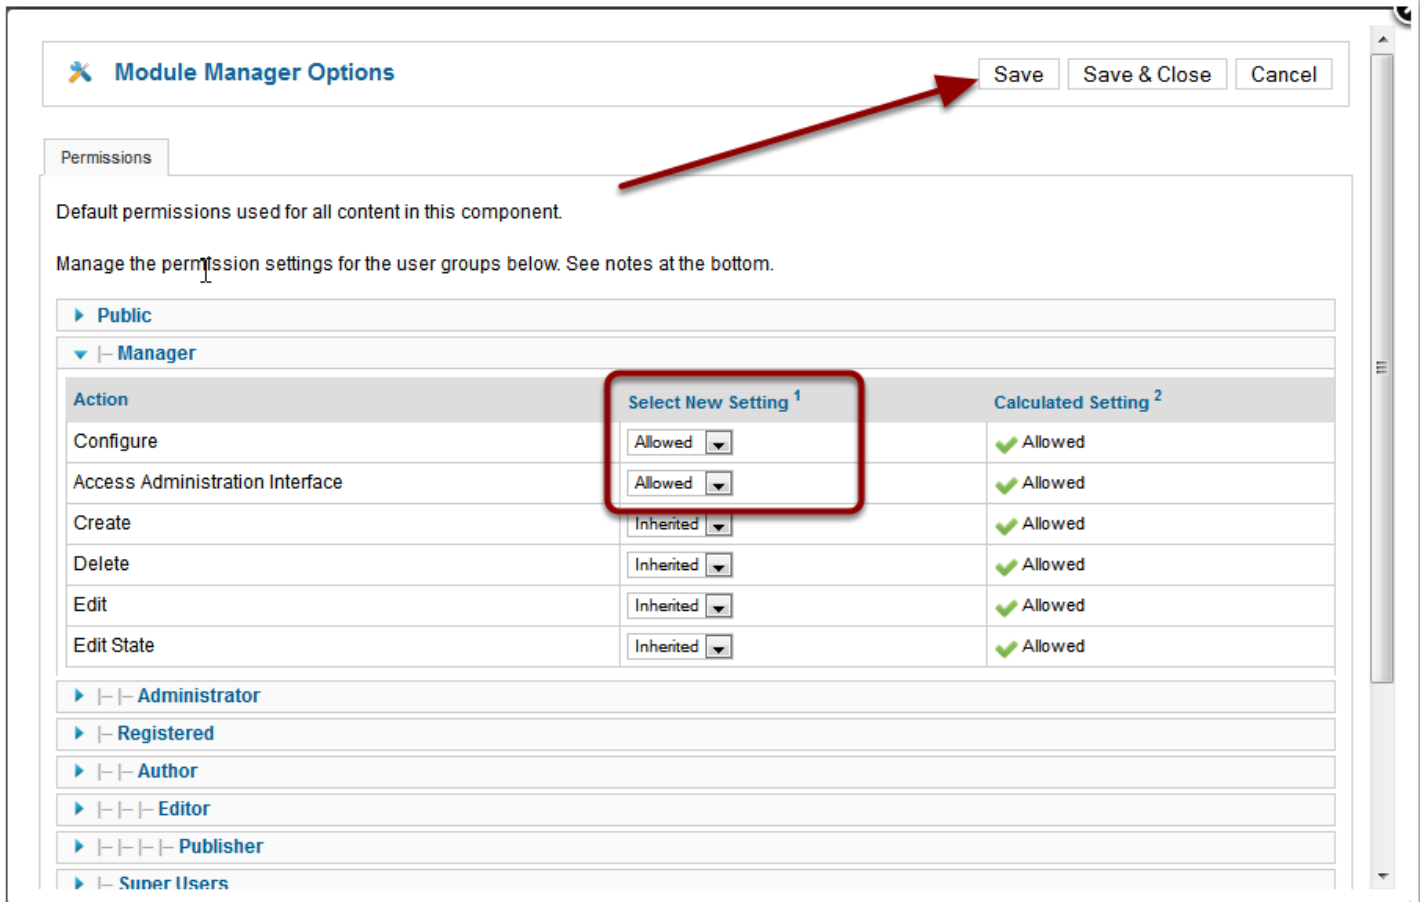

The screenshot shows the Joomla! administrator interface. At the top, there is a navigation bar with 'Extensions' and 'Help' menus. Below this, a status bar displays '0 Visitors', '2 Admins', and '0' items. A toolbar contains icons for 'New', 'Edit', 'Duplicate', 'Publish', 'Unpublish', 'Check In', 'Trash', and 'Options'. A red arrow points to the 'Options' button. Below the toolbar are several dropdown menus for filtering: '- Select Status -', '- Select Position -', '- Select Type -', '- Select Access -', and '- Select Language'. At the bottom, a table lists installed extensions.

Position	Ordering	Type	Pages	Access	Language
None ::	<input type="text" value="0"/>	Custom HTML	All	Public	All
osition-2	<input type="text" value="1"/>	Breadcrumbs	All	Public	All

Click "Options"

Allowing access to Module Manager to the "Manager" Group

Set actions to "Allowed"

The screenshot shows the "Module Manager Options" dialog box. At the top right, there are buttons for "Save", "Save & Close", and "Cancel". A red arrow points from the "Save" button towards the "Manager" group in the table below. The "Permissions" tab is active, showing a table of actions and their settings for various user groups. The "Manager" group is expanded, and its settings are shown in a table with two columns: "Select New Setting¹" and "Calculated Setting²".

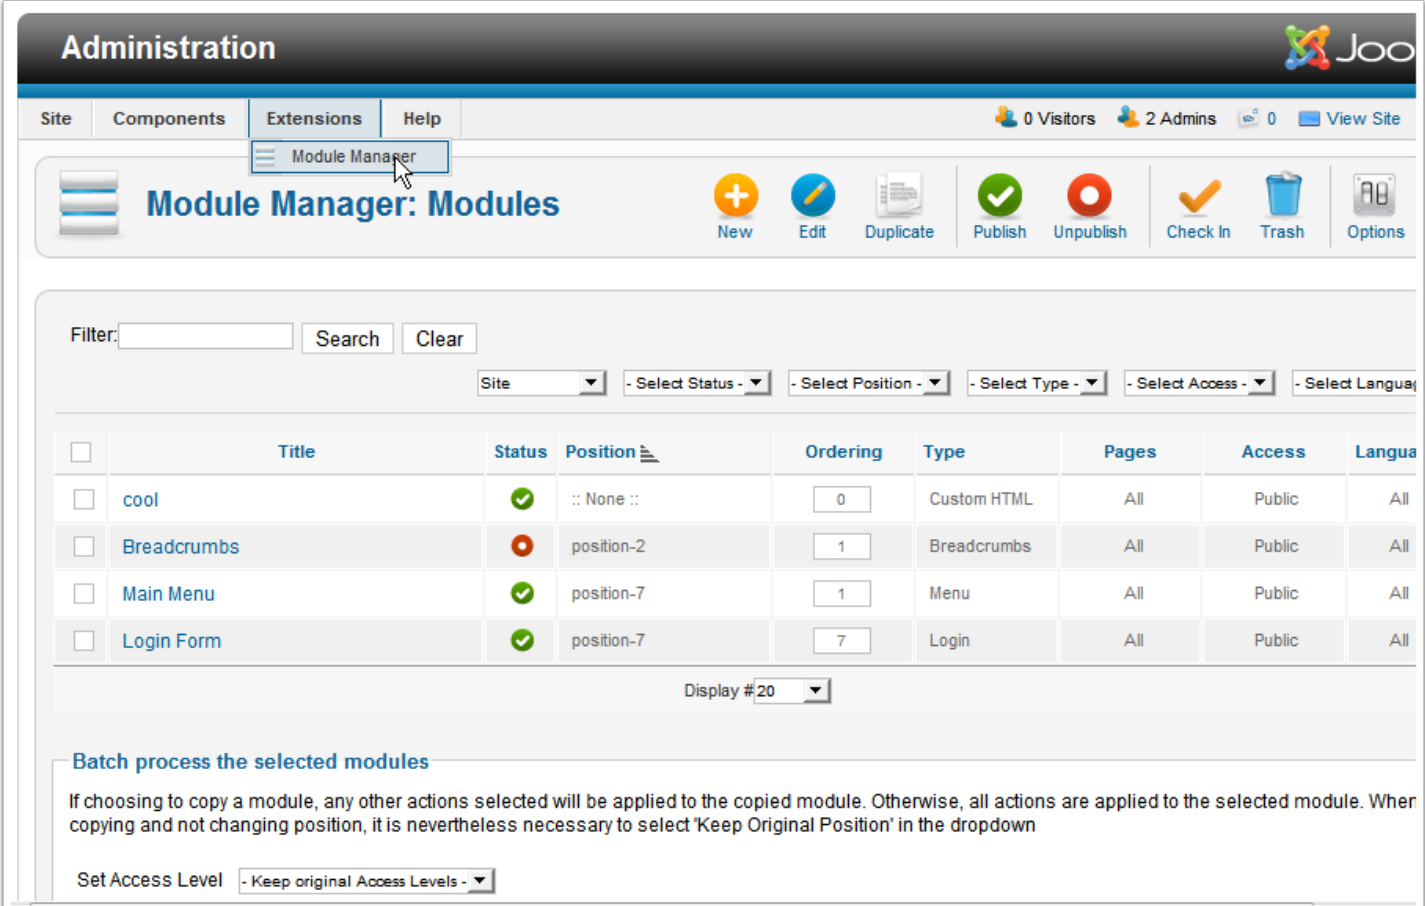

Action	Select New Setting ¹	Calculated Setting ²
Configure	Allowed	✓ Allowed
Access Administration Interface	Allowed	✓ Allowed
Create	Inherited	✓ Allowed
Delete	Inherited	✓ Allowed
Edit	Inherited	✓ Allowed
Edit State	Inherited	✓ Allowed

Below the table, there are expandable sections for other user groups: Administrator, Registered, Author, Editor, Publisher, and Super Users.

In the "Manager" tab set both "Configure" and "Access Administration Interface" to "Allow." (By default it's "Inherited"). Then save.

Allowing access to Module Manager to the "Manager" Group

Result

The screenshot displays the Joomla! Administration interface. At the top, the 'Administration' header is visible with the Joomla! logo. Below it, a navigation menu includes 'Site', 'Components', 'Extensions', and 'Help'. The 'Extensions' menu is expanded, showing 'Module Manager' as a sub-option. The main content area is titled 'Module Manager: Modules'. It features a toolbar with icons for 'New', 'Edit', 'Duplicate', 'Publish', 'Unpublish', 'Check In', 'Trash', and 'Options'. Below the toolbar, there is a search filter section with a 'Filter:' input, 'Search', and 'Clear' buttons. A series of dropdown menus allow filtering by 'Site', 'Status', 'Position', 'Type', 'Access', and 'Language'. The main table lists modules with columns for 'Title', 'Status', 'Position', 'Ordering', 'Type', 'Pages', 'Access', and 'Language'. The table contains four rows: 'cool', 'Breadcrumbs', 'Main Menu', and 'Login Form'. Below the table, there is a 'Display #20' dropdown and a section titled 'Batch process the selected modules' with explanatory text. At the bottom, there is a 'Set Access Level' dropdown set to '- Keep original Access Levels -'.

<input type="checkbox"/>	Title	Status	Position	Ordering	Type	Pages	Access	Language
<input type="checkbox"/>	cool	✓	:: None ::	0	Custom HTML	All	Public	All
<input type="checkbox"/>	Breadcrumbs	✗	position-2	1	Breadcrumbs	All	Public	All
<input type="checkbox"/>	Main Menu	✓	position-7	1	Menu	All	Public	All
<input type="checkbox"/>	Login Form	✓	position-7	7	Login	All	Public	All

When a user of the "Manager" Group this'll be the result - He'll be able to open the Module Manager under Extensions and can edit / create modules (as far as I tested)
